

Orion Shared Care Plans – minimum required fields

- Orion Shared Care Plans are intended to be as simple or as detailed as GP and patient need.
- For this reason, Orion shared care plans only have one required field: the consent box (pictured below).

 I have provided the NNSW Shared Care Platform Information and Privacy fact sheet to the patient; the patient has indicated that they have read the information, and has consented to be enrolled on the NNSW Shared Care Platform.

Consent Provided

Consent is required

- All other sections are optional.
- However, some sections have mandatory fields. If a GP does not have information to enter in these sections, the small cross (circled red in image below) should be used to close/remove the section so the required field warnings (shown below) do not appear.
